This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THE Library of the Royal Institution has been founded by the liberality of a few Noblemen and Gentlemen, for the immediate use of the Subscribers to that Establishment, and, it may be said, for that of the Public at large; as any person, on the recommendation of one of the Patrons, may always have access to it.

The Library, in its present state, will be found as useful as many more splendid establishments, supported by Royal or National munificence. It contains the best and most useful Edition of every Greek and Roman Classic Author, with the best translations in English, and some in other modern languages. The Class of Mathematical Science in all its branches, is very full, with the best Scientific Journals and Transactions of learned and philosophical Societies. The Historical Class, particularly the English, in its various divisions and subdivisions, will be found very interesting: the Managers having, at the formation of the Library, procured the entire collection of the late Thomas Astle, Esq. author of *The Origin and Progress of Writing:* which Library was chiefly collected by the Rev. Philip Morant, author of the *History of the County of Essex.* Many of the Books are enriched with his Manuscript Notes; particularly those relating to Biography

The usual Classification has been generally followed, with a few exceptions in some of the Classes. It has also been thought advisable to keep the Greek and Roman Classics in two distinct alphabetical Classes, rather than distribute them under their respective heads of Historians, Poets, Orators, &c.

In the alphabetical Index will be found, not only the names of Authors of entire Works, but also of those in the different Classical Collections of *Stephens*, *Grotius*, *Maittaire*, *Reiske*, *Brunck*, *Jacobs*, and *Wernsdorf*, and likewise the Writers in the great Historical Collections of *Gronovius*, *Grævius*, *Burmann*, *Sallengre*, *&c.*; nor is it less complete in the contents of the collections of our English Historians, by *Camden*, *Twysden*, *Fulman*, and *Gale*.

This Catalogue will be found very useful in all Libraries; as, under each head, not only all the best Authors are to be found, but also every particular Treatise contained in the Miscellaneous Collections of their Works; such as those of *Bacon*, *Newton*, *Leibnitz*, *Boyle*, and *Locke*; for instance, at page 64, among the Books on Money and Coin, will be found *Locke on Money and Coin*, with a reference that it is in the 2d volume of his Works: also, under the Class of Geography, Voyages and Travels, every distinct Voyage contained in the Collections of *Ramusio*, *Churchill*, *Harris*, *&c.* is arranged under the respective Island or Country therein described.

The same method is followed in all the different Classes of Science and History; and by referring to the Synoptical Table of Contents, the Reader will find a list of the best Writers on every branch of knowledge. In order to render the Lists more

complete, several Books are inserted, marked with a †, which are not at present in the Library, but are intended to be placed there when the funds of the Institution will permit them to be purchased.

Among the English Antiquities there is a frequent reference to *Antiquary Tracts, in 5 vol. 4to.:* this is a miscellaneous collection made by Mr. Astle, therefore cannot be found in the same order in other Libraries. It is also necessary to remark, to avoid the charge of inaccuracy, that allowance must always be made for the difference of *Editions*, as in the case of the Universal History, the reference being to the second Edition in Octavo, which varies in a volume or two from the first Edition of that work.

PREFACE

TO THE

SECOND EDITION,

1821.

SINCE the first Edition of this Catalogue was published, many of the articles marked therein as wanting have been purchased, and many of the modern Publications and Continuations of the foreign and domestic Journals have been added to the Library: it has also received several valuable donations from the Authors

of various Works.—The late Rev. Louis Dutens bequeathed by will, Eighty-nine Volumes of Miscellaneous Tracts, the principal of which are specified in the Catalogue under their respective Classes, with a reference to the volume in which they are bound. Lady Banks presented a portion of the Library of her late sister-in-law Mrs. S. S. Banks; John Guillemard, Esq. F. R. S. One Hundred and Sixty Volumes relating to America; and the British and Foreign Bible Society, Forty-four Volumes of Bibles and parts of the New Testament, in Foreign Languages.

In the Classes of *Scriptores Ecclesiastici*, (page 12) and *Auctores Classici*, (page 103) will still be found many articles marked with a dagger (†), as not being in the Library at present; but it is hoped the encreasing prosperity of the INSTITUTION will soon enable the Patrons to place them there. The advantage of such a List of Greek and Latin Authors to Scholars cannot fail to be properly appreciated, when it is known to be printed from the Manuscript of the late Rev. Dr. Charles Burney, one of the Honorary Librarians, who intended it should have been inserted in the former Edition, as will be seen by the following letter to the Editor:—

" *To Mr. Harris, Royal Institution.*

" Dr. Charles Burney acquaints Mr. Harris, that he drew up the Classical Catalogue with a view to its being *printed*, whole and entire. As there is no List of Greek Books so ample, he still thinks that its publication might be of service to the sale of the R. I. Catalogue; but readily submits the matter to the decision of the Patrons.

" *Greenwich, March* 3, 1809."

The Editor being now left to his own judgment, has not hesitated a moment to fulfil the wishes of that eminent Scholar, as a memorial of his respect and gratitude for personal favours received from him.

It has been suggested, that the making known the mode of reference to the Books in the Library of the Royal Institution will be useful to Gentlemen possessed of large libraries; this is not by the usual mode of letters of the alphabet over the cases, but by simply numbering the shelves, as 1. 2. 3. 4. &c. which may be carried on to any extent, and save the repetition and confusion of three or four letters; one of which numbers being inserted in pencil against each book in the alphabetical catalogue, is easily erased and replaced by a new number, on a change of arrangement.

GOLDEN volumes! richest treasures!
Objects of delicious pleasures!
You, my eyes rejoicing please,
You, my hands in rapture seize!
Brilliant Wits and musing Sages,
Lights who beam'd through many ages!
Left to your conscious leaves their story,
And dared to trust you with their glory;
And now, their hope of fame achiev'd,
Dear volumes! you have not deceiv'd!
